Introduction to Green Tower

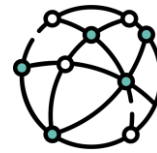

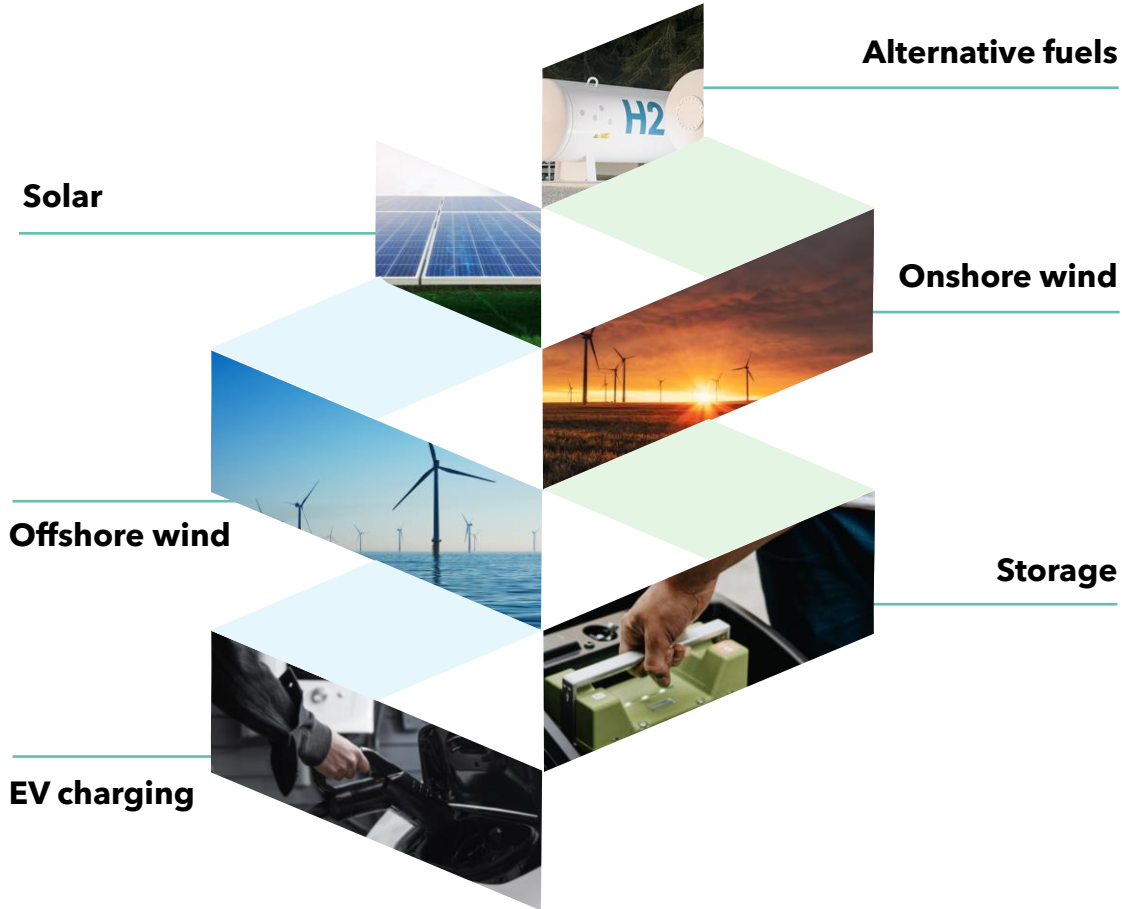

**GREEN
TOWER**

Green Tower, focused on accelerating the energy transition at scale

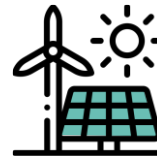

We are a global early-stage investor active across all energy transition sectors

Global investment mandate across all energy transition sectors, with a focus on renewable energy generation in the OECD and Southeast Asia

Flexible funding solutions including preferred equity and convertible loans, generally aiming for minority co-controlling positions

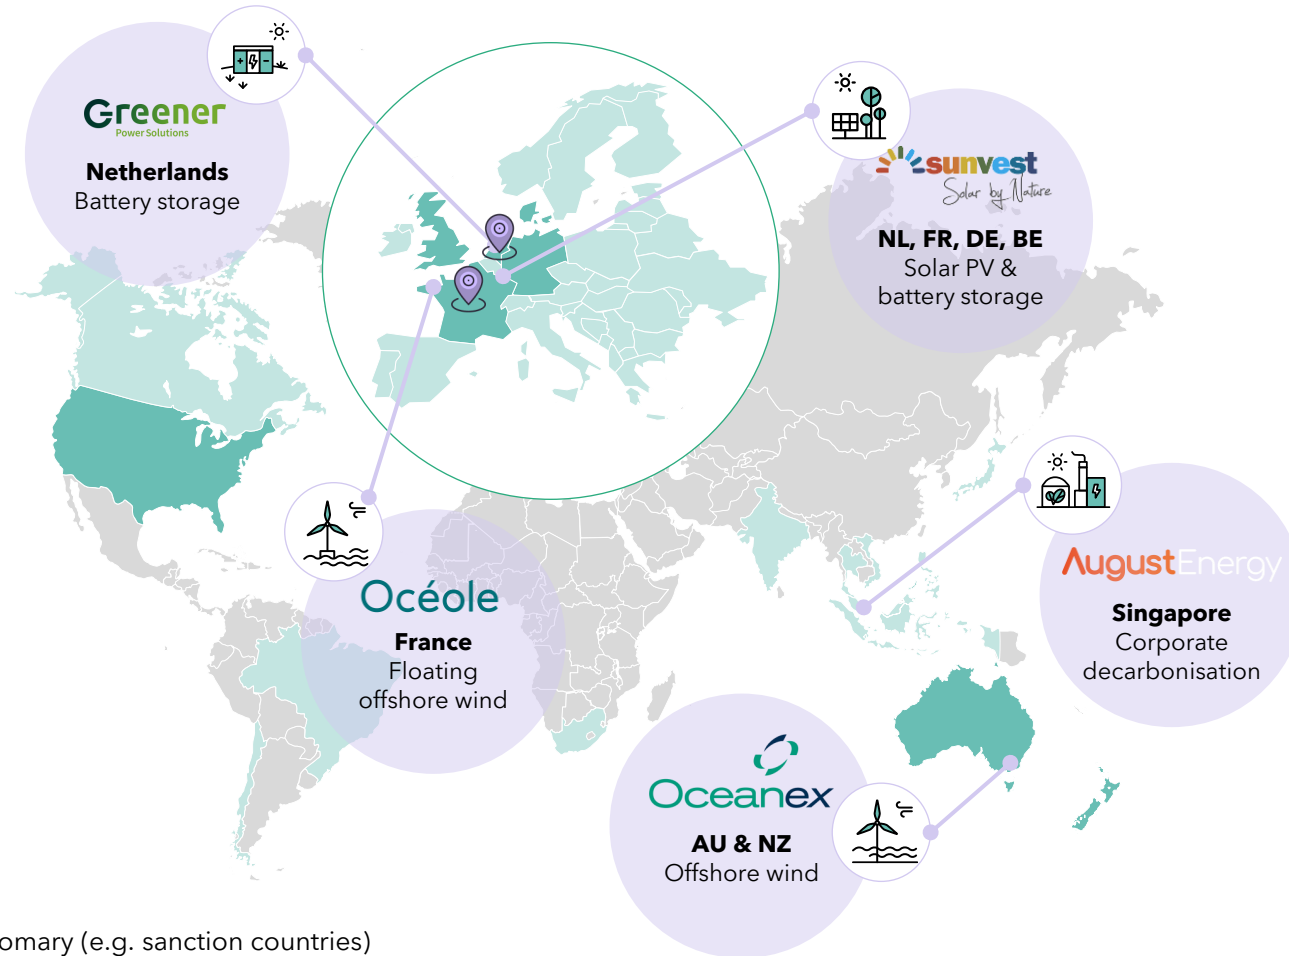

Our portfolio will bring gigawatts of power to operation and funnel hundreds of millions of hard currencies in energy transition infrastructure projects globally

We invest worldwide

The team comprises 15 professionals based in Utrecht and Paris focusing on development, contracting, financing and asset management. We shape the energy transition with decades of knowledge in developing and financing renewable energy and energy transition infrastructure projects across the world

- Current and past participations
- Additional countries of interest
- Limited investment mandate restrictions except customary (e.g. sanction countries)

Our investments vary by technology, geography and development stage

Examples of past participations, now exited

Suniverse

- * Residential solar PV
- Netherlands
- Entry 2016, exit 2022
- Buyer: Eneco

Two Towers

- * 19 MW offshore wind farm
- Netherlands
- Entry 2018, exit 2022
- Buyer: Octopus Energy Generation

Greener

- * Storage & grid
- Netherlands
- Entry 2019, exit 2022
- Buyer: DIF Capital Partners

Examples of current (public) participations

Sunvest Ontwikkeling

- * Solar PV & battery storage
- NL/FR/BE/DE
- Entry 2018
- European developer of nature inclusive solar PV parks and battery storage

Oceanex

- * Fixed & floating offshore wind
- Australia and New Zealand
- Entry 2020
- Leading regional offshore wind developer

The Waste Transformers

- Biogas/EfW
- Netherlands
- Entry 2023
- Technology developer converting food waste into biogas, electricity, heat and fertiliser

Sunvest Ontwikkeling joint venture: developing nature inclusive solar parks and co-located storage

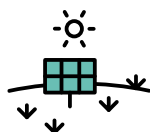

Invested since 2018

Sunvest provides early-stage development capabilities and their sister company **ProfiNRG** provides technical EPC and O&M services

Green Tower provides late-stage development, contracting and financing capabilities as well as asset management

Sunvest Ontwikkeling has over **400+ MW** of projects in operation, construction and ready-to-build stage, plus a **1 GW** early-stage pipeline

The **Sunvest Ontwikkeling** team consists of 30 professionals active across **the Netherlands, France, Belgium and Germany**

 Projects in operation, construction and at ready-to-build in the Netherlands

We are finance pioneers shaping the energy transition

1 Green Tower works alongside partners, sharing every step of the way into their business, helping to build and manage renewable operations with an impact on the planet

2 We enable our partners to kick-start ambitious and innovative ventures with the aim of empowering the real value drivers: entrepreneurs

3 We help to shape the energy transition by investing where it matters
